

MTU Aero Engines AG extends its partnership with Caverion in Germany

Caverion Press release 15 April 2025 at 10.00 CET

MTU Aero Engines AG extends its partnership with Caverion in Germany

Caverion continues to be responsible for the technical facility management at MTU Aero Engines' Munich site for another contract period. The contract is a continuation of a long partnership already over 10 years.

Caverion's onsite team covers technical maintenance of building systems, such as heating, plumbing, air conditioning, refrigeration, ventilation and technical gases, building automation and electricity. The total area of the site is around 400,000 m².

As MTU Aero Engines' partner, Caverion will continue to support them in meeting their greenhouse gas reduction targets at the Munich site. By 2030, MTU Aero Engines aims to reduce their emissions at all their sites by 60% compared to the reference year 2019. Based on regular energy inspections and energy audits conducted by Caverion, experts can identify potential energy savings at the site and opportunities for modern systems in existing buildings.

“Caverion is a trusted partner for us, and we appreciate the service team's many years of experience and deep understanding of the requirements we face in production,” says **Paul Koop**, Senior Manager of Technical Facility Management, MTU Aero Engines. “Our team has strong expertise in technical facility management, which ensures high quality of services. We are confident that we are the right partner for MTU Aero Engines in the complex challenges at the Munich site in the future too,” adds **Manfred Simmet**, EVP and CEO, Caverion Germany.

About Caverion

Caverion is an expert for smart and sustainable built environments, enabling performance and people's well-being. Customers can trust our expertise during the entire life cycle of their buildings, infrastructure or industrial sites and processes: from installation and maintenance of base and smart technologies, to managed services as well as advisory and engineering services and digital solutions.

In April 2024, Assemblin and Caverion combined to create a leading northern European technical service and installation company, Assemblin Caverion Group. Together, we are about 21,000 skilled professionals in nine countries, sharing the passion for smart and sustainable solutions. Our combined revenue amounts to SEK 42 billion (EUR 3.7 billion).
