

## **Caverion and Fortum to cooperate in the technical installation and maintenance of district heating energy meters in Finland**

Caverion Corporation Press release May 28, 2015 at 2:30 p.m. EEST

### **Caverion and Fortum to cooperate in the technical installation and maintenance of district heating energy meters in Finland**

Caverion and Fortum Power and Heat signed today a business transfer and service agreement on the technical installation and maintenance of energy meters. In accordance with the agreement, Caverion will assume responsibility for the technical installation and maintenance and control services of district heating and district cooling meters and gas meters in the Espoo and Central Uusimaa district heat distribution area. The business transfer and service agreement is effective from September 1, 2015. The value of the agreement will not be disclosed.

In connection with the business transfer, five people will, from September 1, 2015, be transferred to Caverion Suomi Oy as existing employees in accordance with Finnish legislation.

"It was important for us to find a partner that can ensure the high quality of meter services and offer our specialists a good workplace. Caverion's operating model and experience in offering services to energy companies were important factors in choosing a partner," says Timo Aaltonen, Head of Production at Fortum.

The agreement covers the approximately 8,600 energy meters currently in the Espoo and Central Uusimaa district. Installation and maintenance activities include the installation and maintenance of district heating energy meters, modems and their terminal devices, ensuring data transfer and customer communications.

"We cooperate with energy companies, and energy meter installation and maintenance is smoothly integrated into our service business. Caverion develops user-friendly and energy-efficient solutions and service concepts for infrastructure networks. Built-up and urbanising environments need reliable and safe energy networks. We would like to wish the Fortum professionals about to join us a warm welcome to our team," says Ville Tamminen, Vice President, Sales, Marketing and Development at Caverion Finland.

Fortum belongs to Caverion's industrial client segment.
