

Caverion to implement a power line in OX2's new largest renewable energy investment project in Finland

Caverion Press release 1st of April 2025 at 10:00 EET

Caverion to implement a power line in OX2's new largest renewable energy investment project in Finland

OX2 has made Finland's largest renewable energy investment decision and is building the Rajamäenkylä and Honkakangas wind farm.

Caverion is responsible for the construction of the Rajamäenkylä wind farm power line in the project. The 27 km long power line will be built between Rajamäenkylä and Honkajoki. The power line will enable feeding energy from the wind farm into the main grid at the Honkajoki substation. The construction of the power line will begin in the spring of 2025 and will be completed in the summer of 2027.

The project involves the construction of a 400 kV power line with a total of 73 poles as a turnkey project.

"The investment decision shows that Finland has excellent conditions for a significant increase in renewable energy production. It is great to start construction work at the Rajamäenkylä wind farm. We also appreciate the effective cooperation with our partners – it enables the success of our projects," says **Veli-Pekka Aikula**, Country Manager of OX2 Finland.

"We are strongly involved in several energy sector projects and the energy transition. We provide services and solutions across the entire energy chain, from planning to production and

distribution. It is a pleasure to be involved in the customer's major investment with our strong expertise," says **Kari Aalto**, Head of Business, Industrial Projects and Infrastructure, Caverion Finland.

The value of the contract is over 11 million euros.

About Caverion

Caverion is an expert for smart and sustainable built environments, enabling performance and people's well-being. Customers can trust our expertise during the entire life cycle of their buildings, infrastructure or industrial sites and processes: from installation and maintenance of base and smart technologies, to managed services as well as advisory and engineering services and digital solutions.

In April 2024, Assemblin and Caverion combined to create a leading northern European technical service and installation company, Assemblin Caverion Group. Together, we are about 21,000 skilled professionals in nine countries, sharing the passion for smart and sustainable solutions. Our combined revenue amounts to SEK 42 billion (EUR 3.7 billion).
